

Why Alkapi water?

1. To Hydrate your body...Superior Hydration

- a. Water molecules from Tap or dead water forms clusters of 12-13 molecules
- b. Alkapi water molecules mostly exist in cluster size of 6 molecules (Hexagonal Water-See Index)
- c. Smaller cluster size, weaker surface tension, thus easier to be absorbed (more than 6 times better absorbed than tap water)
- d. Alkapi water moves throughout the body more rapidly enhancing cellular function/communication, metabolic function.

2. To Detoxify...to Alkalize...

- a. Well balanced acid-alkaline food is required to stay healthy longer
- b. Unfortunately, more acid than alkaline is accumulated...
 - i. By the food
 - 1. much more fast foods/processed foods are being consumed than fresh food like vegetables/fruits
 - 2. daily consumption of carbonated drinks/coffee/alcohol
 - ii. By the polluted environment
 - 1. polluted air
 - 2. polluted waste water
 - 3. polluted soil
 - iii. By the way of living
 - 1. Constantly under stress
 - 2. Depression
 - 3. Anxiety
 - iv. By the drugs to treat acidosis symptoms
- c. In order to detoxify what was accumulated for years, alkalizing food must be consumed.
 - i. To neutralize the acid from one 12 oz. of cola or soda, it takes 32 glasses of alkaline water at a pH of 9.
 - ii. Eating alkaline food alone is enough to detoxify only if you can eat as much.

- d. Alkaline water is very effective in neutralizing and melting away solid acid wastes.
 - i. More effective than eating alkalizing food
 - 1. faster
 - 2. no unnecessary by-product/wastes from digesting
 - ii. Immediate response: more frequent urination, smoother, more regular bowel movements...within a week
- e. Alka pi water has an average pH of 9.0~10.00
- f. Cancerous cells do well in the acidic environment where healthy cells die away in the same environment.
- g. Purified/Distilled water is highly unstable, thus in contact with CO₂ it becomes acidic (pH 5-6), thus contributing more stress on already acidic body.
 - i. Due to absence of minerals in the water, RO water or distilled water may leach minerals from your body
 - ii. Due to highly unstable state, this water may pick up organic material that comes in contact with it.
 - iii. Depending on plastic bottles that store this type of water, plastic from the walls of the container may be picked up and melted into the water
 - iv. RO unit needs to be sterilized periodically because bacteria can grow back in the holding tank especially in warm climates.
 - v. Distilled water is subject to spoilage if left open and unrefrigerated for many days. Even kept in fridge, the life is limited.

3. To Build Stronger Immune System...

- a. Hexagonal water has been found in greater abundance around healthy DNA.
- b. Unorganized water such as Pentagonal water has been found in conjunction with diseased DNA.
- c. Drinking hexagonal water regularly for general improvement in health.

4. To Stop Calcium depletion from bones (to stop osteoporosis)

- a. Eating more acid forming food means depleting Calcium from bones.
- b. When you eat enough Calcium, blood can use it to buffer its pH in presence of increased acidity. If there isn't enough Calcium around, the blood will extract Calcium from the Calcium bank, the bones.
- c. Unfortunately, although extracted from the bones to be used in specific areas of the body, Calcium doesn't end up where it is needed. If the calcium ends up in the kidneys, it will form kidney stone. (Calcium Paradox)
- d. You can supplement your body with 100% daily recommended Calcium by just drinking 500mL of Alkapi water. Excess calcium, on the other hand, will not accumulate to form stones in different parts of the body, but instead will drain down.

5. To Act as an Anti-Oxidants/Anti-Aging

- a. Alkapi water is rich in hydroxyl ions (OH^-)
- b. Hydroxyl ions neutralize cancer causing and destructive free radicals in the body.
- c. Thus slowing down aging or even reverse aging

6. To Energize

- a. Oxygenate (not oxidate) body with rich hydroxyl ions
- b. By passes unnecessary acid forming from combustion in order to provide energy

7. To Mineralize...with Alkalizing Minerals

- a. Minerals in the water are better absorbed than those in the food

8. To Enjoy better health

- a. Minor cuts heals faster if directly applied
- b. To prevent bruises from developing, consistently spray with Alkapi water for the first hour after an injury.
- c. Overall increase in health, promotes better life

Index:

Hexagonal Water Structure- composed of six individual molecules of water, held together by common hydrogen bonds. This water structure found naturally in snow water. It has also been found to form the initial layer of water surrounding healthy cells. It is found in young or healthy individuals and other healthy protein

forms. Hexagonally structured water is involved in cellular communication, intracellular water movement, enzyme function and many other metabolic processes. The amount of Hexagonal water in the body has been correlated with aging. This unique water structure is capable of rapid penetration within the cells of the body.

(Most tap water and bottled water is composed of large water conglomerates which are too large to move freely into the cells. It must be restructured within the body to penetrate the cells (a time-consuming and energy-consuming process).

Babies have almost 100% hexagonal water in their bodies when they are born. ("The Water Puzzle and the Hexagonal Key")

Pentagonal Water Structure- Water with pentagonal molecule arrangement (five molecules joined by the weak hydrogen bond) is clean but has an un-natural or deformed cluster structure. This type of water structure is found in AIDS, HIV and other immune deficient individuals and all protein systems that are disease producing. Unhealthy or older individuals and protein systems which are prone to disease have this deformed, un-natural water structure. Reverse Osmosis systems produce this type of water. (Where as Osmosis means a natural process, Reverse Osmosis indicates the natural process is reversed (un-natural).
